

MASTER 65✓

Designed to support camera weights from 20 Kg (44 lbs) to 65 Kg (143 lbs), the new **MASTER 65** is ideal for outdoor Broadcast with bulky boxed lenses.

It combines a wide range of counterbalance capabilities with a new CARTONI Fluid drag system based on silicon film.

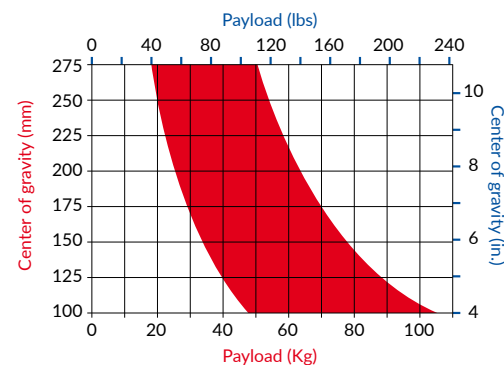

The new drag ensures almost freewheeling at its minimum up to consistent drag for smooth and slow movements with long focal lengths.

The micrometric movements of the slide are operated by a handy crank placed under the slide.

All settings are ergonomic and placed in the right positions.

MASTER 65 comes equipped with a digital readout for counterbalance reference and illuminated spirit bubble.

The MASTER 65 flat base interfaces with Mitchell mount T ripods, Pedestals and other supports via 4 bolts fixing system, 2 ¼ inch castle-nut or a M12 threaded central knob.

SPECIFICATIONS

Min. Payload capacity	20 Kg	44 lbs
Max. Payload capacity	65 Kg	143 lbs
Weight	16 Kg	35.3 lbs
Pan range	360°	
Tilt range	± 65°	
Counterbalance	Continuous	
Fluid drag	Continuous	
Attachment	Flat Mitchell/4 bore holes	
Camera plate	Dovetail	
Temperature range	-40°/+60° C	-40°/+140° F
