

Practilite 802 IP54 Dust and Waterproof LED light

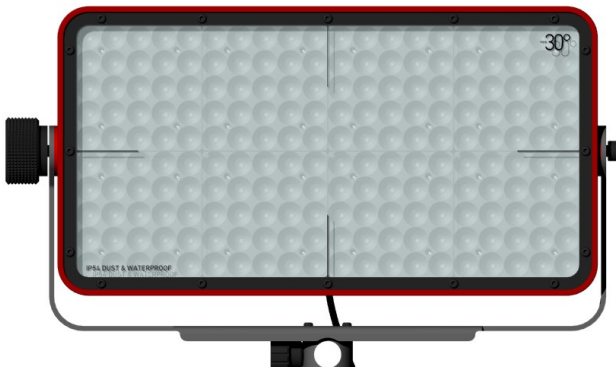

The Practilite 802 bi-color, power-panel LED light, ideal for ENG, documentaries, reality TV production and event videography. Practilite 802 employs advanced secondary optics to achieve unprecedented light output and power efficiency in a portable unit.

Practilite 802 is rugged and compact, Designed to provide a solid and powerful lighting solution everywhere and in all conditions.

Professionals can explore new creative horizons enabled by weather sealing and portability.

It also features a silent cooling system and an IP54 rating for dust and waterproofing, allowing for its use in virtually any production situation.

The 804 connects effortlessly with smart devices for quick set-up and easy adjustment, even when hard to reach.

“The added advantages of silent operation plus dust and waterproofing make it an excellent solution for professionals who need a powerful light source that works in all conditions, even without power outlet.”

About 50% more powerful than most popular 1x1 LED panels, Practilite 802 delivers 1860 fc at 30-degree beam (370 fc at 90-degree beam, fully diffused) while consuming a maximum of 90W. The built-in 30-degree lens arrays are complemented by two state-of-the-art rigid diffusers, which provide efficient diffusion for beam angles of 60- and 90-degrees.

Specifications:

Output @ 3.3 ft	1860 fc @ 30 degree beam and 370 fc @ 90 deg. beam fully diffused
Power consumption	90W max
Wireless Control via App	Intensity and Color Balance
DMX512	Via additional adapter
Cooling	Silent passive, no noise
Weather protection	IP54 rating.Dust and Waterproof, usable in all conditions
Weight	7 lbs
Physical dimensions	8.7 x 14.5 x 2“, "Half panel" form factor
